DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 27-40 in the reply filed on 9/8/05 is acknowledged. Thus, claims 41-48 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse on 9/8/05.

An Office action on the merits of claims 27-40 as follows.

The Title

- 2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
- 3. The abstract should have been revised to reflect the method invention.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter recited in claim 27 such as " a first and second trays having configuration requirement must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Application/Control Number: 10/073,620

Art Unit: 3729

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. The specification is objection to because it is failed to fully describe the claimed features recited in claim 27 i.e., "a first and a second tray and their operatively connected to form a working device.

The specification is also objected to because the related application has already matured into a patent, therefore after "filed in February 17, 1999" (in the specification, page 1, line 6) should be added: --, now US Patent No. 6,266,869, issued July 31, 2001--. Further, the reference to application No. "95/250,823" is incorrect, and should be updated to patent No. since the application has been matured into a patent.

Application/Control Number: 10/073,620

Art Unit: 3729

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 7. Claims 27-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In this case, the claimed subject matter of claim 27 was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor at the time the application was filed, had possession of the claimed invention.
- 8. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 27-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Many phrases are unclear and confusing for examples: It is not known whether "at least one of the component receptacle of the first side of the second tray" (claim 27, line 9) is same as that as previously cited in claim 27, line 6. Also, it is unclear whether a single "component positioned" (see claim 27, line 11) is as one of the plural components as previously cited in claim 27, line 1.

10. Regarding claims 7 and 11. It is noted that <u>no art rejections have been</u> applied to claims 27-40, since there are a great deal of confusion an uncertainty as to the proper interpretation of the limitations of the above claims. Therefore, it would not be proper to reject such claims on the basis of prior art. See MPEP 2173.06.

Conclusion

- 11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited for their teachings of holding system including trays or the like.
- 12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Trinh whose telephone number is (571) 272-4569. The examiner can normally be reached on Monday -Thursday 8:00 am to 4:30 pm.
